**PUBLIC UTILITY COMMISSION
OF TEXAS**

**LONE STAR TRANSMISSION, LLC'S REPORT AND
ATTESTATION DEMONSTRATING COMPLIANCE WITH HOUSE BILL 4150**

TO THE HONORABLE PUBLIC UTILITY COMMISSION OF TEXAS:

In accordance with the Commission's Division of Compliance and Enforcement's memorandum dated October 4, 2021, Lone Star Transmission, LLC ("Lone Star") hereby submits the following report and supporting affidavit attesting to compliance with Section 6 of House Bill ("HB") 4150, 86th R.S., amending Section 38.004(b) of the Public Utility Regulatory Act ("PURA"). Lone Star respectfully submits as follows:

I. BACKGROUND

The Division of Compliance and Enforcement's October 4, 2021 memorandum required each electric utility, municipally owned utility, or electric cooperative meeting the requirements of Section 6 of HB 4150 to file in this project a report with the following information:

- A declaration that each distribution line above 1 kilovolt or transmission line above 60 kilovolts owned by the utility that crosses a lake listed in PURA § 38.004(b) meets the applicable vertical clearance requirements established in Rule 232 of the National Electrical Safety Code ("NESC") Standard ANSI (c)(2).
- The date on which the company verified each line's compliance with the applicable NESC Standard.
- For each utility that self-identified a line that did not meet vertical clearance requirements in an annual report filed in either Project 50596 or Project 51890, a declaration that each line identified in the annual report meets the NESC Standard.
- If a line over a lake listed in PURA § 38.004(b) does not meet the NESC Standard:
 - The name of line;

- The name of lake and the county or counties in which the lake is located;
- A narrative description of actions the utility will take to bring the line into compliance with the NESC Standard; and
- The date by when the line will be brought into compliance.

II. REPORT

Lone Star is a transmission-only utility that provides transmission service within the ERCOT region. Lone Star owns one transmission facility that crosses a lake listed in PURA § 38.004(b), and Lone Star has verified that this transmission facility meets the applicable vertical clearance requirements established in Rule 232 of the NESC Standard ANSI (c)(2), as described below. As a transmission-only utility, Lone Star does not own any distribution facilities.

Lone Star Transmission Facility	Lake Listed in PURA § 38.004(b)	Date Compliance Verified
West Shackelford to Navarro 345 kV Transmission Line, Segment J	Navarro Mills Lake	May 1, 2020

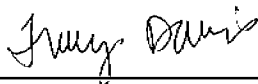

As Lone Star reported in its reports submitted in Project Nos. 50596 and 51890, Lone Star has not previously identified any transmission lines as not meeting the NESC vertical clearance requirements of PURA § 38.004(b) for purposes of complying with Section 6 of HB 4150.

The affidavit of Aundrea Williams attesting to the facts in this report is provided as Attachment 1.

III. CONCLUSION

Lone Star respectfully requests that the Commission accept this report and accompanying attestation.

Respectfully submitted,

Tracy C. Davis, Senior Attorney
